The Pioneer Store Guessing Contest This Month's Prize Is A Beautiful Garden Cultivator

When in town don't forget to make a special effort to see this Cultivator now displayed in our window.

For every \$1.00 purchase you are entitled to a guess of how many beans are in the jar. The first person guessing right or the nearest right number wins the prize.

The cultivator was purchased from J. A. Hayes & Sons who will give \$12.00 to the winner for the cultivator if they have no use for it.

We are Agents for

Prohibition Will Be Put In Force in Ontario By Sept. 15

The Ontario Temperance Act is being passed in the Ontario House for the closing of all licensed hotels and clubs by the 15th of Sept.

No licenses will be granted after the 31st of March and a reasonable time will be given for the disposal of all stocks. A nominal fee will be collected for the continuance of the bars after the first of April and until the bars are closed.

The Ontario Act closely resembles the Manitoba Act.

After the war a referendum will probably be put before the people as to whether they wish the hotel bars to open again or not.

Change of Date

Judge Mahaffy advises that Chambers will not be held on the 7th and 21st of April as posted. The new date will be the 14th of April.

Council Meeting

At a special meeting of the Village Council held on Wednesday evening the tender for the erection of the jail was awarded to Johnson & Dickenson. Their tender was \$338.00 for material and work.

On account of the price of steel cells having advanced 30 per cent, the Council is endeavoring to get in touch with some cells formerly used by other cities.

Operations on the building will commence in another week.

War News

Germans make unimportant gains after vigorous attacks at Verdun.

Except at one point the Germans were unable to get out of their trenches.

After several hours of heavy bombardment the Huns attempted another push on Verdun but, with the exception of a small sector of land, they were unable to advance as the French curtain of fire was too much for them. There has been great artillery activity along the whole front.

The Russian offensive increases all along the Eastern front and it is reported that the Austro-Hungarians have again abandoned Czernowitz the Capitol of Bucowina.

The Russians have captured Ispahan in Persia.

Bad weather has again broken out over the Austro-Italian front but the heavy bombardments still continue.

Misses Gehrke Millinery Opening will be postponed until April 7th, owing to stock being delayed.

Carranza's Men Have Joined Villa

It is reported that over 2,000 Mexican soldiers have deserted and joined the bandit chief.

Grave apprehension is felt in Washington over this turn in the affairs of the Mexican situation.

Ione Items

Miss Keltz spent the weekend at her home at Willow Brook.

The next meeting of the Helping Hand Society will be held at the school house on Wednesday evening, March 29. A program will be provided, consisting of Music, Recitations, Dialogues and a Debate, the subject of which will be Resolved that it would be in the best interests of Canada to withdraw the free homesteading privilege and to sell all remaining crown lands, the affirmative taken by Rev. Wright and J. McIntyre and the negative by M. I. Sullivan and L. H. Woodrow. A cordial invitation is extended to all.

Joe Woodrow returned today after spending the winter in Ontario.

Creek Valley U. F. A. will hold a meeting on Wednesday March 29th at 2 o'clock.

Pertinent and Impertinent

Who said that Bill was a good whist player.

Next time you will think twice before you change any of Mr. Purdy's signs. You sure looked good making it right again, Mr. Potato.

We notice that Albert is still on the job.

FRIDAY, MARCH 24th, 1916

In the East they are going to submit a plan to the Dominion government for the taking of a census of all male British subjects in Canada of 18 years of age and over, their classification according to occupation and their fitness or preference for certain kinds of work; classification of industries with a view of distinguishing the essential from the non-essential; the application of a just and comprehensive system of draft through which men available for military service may be secured for the overseas forces.

This is a program which is worthy of support and should be endorsed by all patriotic citizens. This war cannot be won by authorizing phantom battalions. The present system of recruiting is obsolete and should be done away with at once. There is too much overlapping with the numerous battalions. Another thing that should be remedied is the giving of commissions to men that know absolutely nothing about military drill or discipline, instead of to the men who have seen active service and deserve it for actual work while at the front. There is altogether too much toadying to men with a pull or a little money, which goes long way with those in power. Commissions in this country should be given out for merit, and not thro influence.

Britain and her allies are fighting for several great principles among them being—liberty; nationality; maintenance of treaty obligations and of the rights of smaller nations which rest upon such obligations; the regulation of the methods of warfare in the interests of humanity, and especially the exemption of non-combatants from the sufferings and horrors which war brings, and the representation of a pacific as opposed to the military type civilization. They are also fighting against the principles which Germany believes in and is waging the present war, that is; that the end of the state is power; that might makes right; that the state is above morality; that war is necessary and even desirable as a factor in progress; that the rights of small states must give way to the interests of great states; that a state may disregard all obligations, whether undertaken by treaties or prescribed by the common sentiment of mankind, and that what is called military necessity justifies every kind of harshness and cruelty in war.

For every one of the hateful principles for which Germany is fighting, there is ample proof that they would enforce them on the world if they were victorious in the present war.

The mild weather during the early part of the week has certainly made it muddy in town.

Note and Comment

There are Americans who want Henry Ford to run for President. Well, Mr. Ford would be the most appropriate candidate possible to represent those who regard him as a fit man for the U. S. presidency.

The French are not content with holding their own before Verdun, they are taking some of the enemy's too. Little Willie's reputation as a general seems doomed to go glimmering.

If all the fourteen countries engaged in the great war, Canada is the least prepared for war; the country with the most inadequate organization. After more than nineteen months of war, with the end not in sight, this country still depends upon the voluntary principle for filling the ranks of the regiments which she is endeavoring to raise, and has done absolutely nothing in the way of national organization of industries to meet the conditions created by the war. As it takes about a year of training to make an effective soldier, now is the time to fill up the ranks; not some months or a year from now.

Whatever advantages may be derived from a just and righteous cause is surely possessed by Britain and her allies in this war.

Shortage of labor is not necessary proof that too many workers are joining the colors. It might be proof that the right class of men are not enlisting.

Prohibitionists may be pardoned for bragging that they would soon induce all Canada to come in out of the "wet."

Bryan says if we are challenged to war we should not accept. Of course not, they should plead no previous engagement.

Gen. Joffre says he has not read a newspaper since the war started. Think of what a lot of first-class strategy he has missed.

Apparently Wilson's method is to collect several congressmen at a time, read them a severe lecture, and tell them to be good boys.

The tide of German "victory" is running high. In a great naval battle off Lowestoff the Huns sunk four fishing smacks, he also succeeded in poisoning six Portuguese sailors by means of a bottle of German synthetic rum. Meanwhile the Kaiser is so delighted with his "victory" at Verdun that he has gone home sick, and that great soldier, the crown prince has been promoted to the retired list. Also 520 hospital trains of wounded soldiers have safely reached Aix-la-Chapelle.

We hope that the Agricultural Society is formed here and also that the creamery project goes thro. These things will help out this district considerably and would be welcomed by everyone, in the country and in town. The cream that is being sent away to enrich other districts should be kept here.

With cold storage room eggs and other farm produce can be kept until the prices are good.

Except in the Bottle— No!

You cannot get real Bovril except in the Bovril bottle. Bovril is so strong that it cannot possibly be manufactured in cheap cubes. It takes the beef of a whole bullock to make a dozen bottles of Bovril. Add Bovril to make your cookery more nourishing and to save butchers' bills. But it **must** be Bovril.

Insect Pests In Canada

Means For Controlling Insect Pests Throughout Dominion

In the report of the Dominion entomologist for the year ending March 31, 1914, which has just been published, an account is given of the activities of the Entomological Branch of the Dominion Department of Agriculture in the matter of controlling insect pests throughout Canada and all who are interested in this subject will be repaid by a perusal of this record of a year's work. The department now maintains nine field laboratories in different parts of the Dominion at which investigations on various insect pests are carried on. This line of work constitutes the chief aspect of the work of the branch. A large amount of work is necessitated by the administration of the Insect and Pest Control Act, or the Insective Insect and Pest Act, involving the inspection and fumigation of trees and plants entering Canada. Perhaps one of the most interesting of the activities of the branch is the work carried on against the Balsam-Post Moth in Eastern Canada particularly, the importation and establishment of the parasites of this insect and the Gypsy Moth. A map is given showing the places in Canada where the Moths have been destroyed by the department.

Other branches of work covered by the report are investigations on insects affecting cereals and other field crops, including an account of the notorious armyworm outbreak of 1913; insects affecting fruit crops, as the result of which investigation work of great practical value has ensued; insects affecting forest and shade trees in which an account of the Balsam-Post Moth in Stanley Park, Vancouver, which has been so seriously affected by frost insects is given; insects affecting domestic animals and man and insects affecting gardens and greenhouse. The report is a record of marked progress in a branch of the work of the department of agriculture which not only affects agriculture, but also forestry and public health. Copies of this report may be had free on application to the Publications Branch, Department of Agriculture, Ottawa, and requests for the report may be mailed free. All inquiries regarding insect pests should be addressed to the Dominion Entomologist, Department of Agriculture, Ottawa, and no postage is required on such letters.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the cures which it performs. It is real and permanent benefit when you have it, and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Use Glass Bottom Boots. Dr. M. S. Inglis, a Canadian army surgeon, who arrived on the Anchor Liner Cameronia from Liverpool, declared that he had knowledge of the capture in British nets of seventeen German U-boats.

Doctor Inglis told how the crew of one of them had been found shot to death after it had been towed ashore. Doctor Inglis said he had been allowed to descend into the submarine and to see the bodies. "To save them from drowning," he said, "he said, 'the admiral had shot all his men and then himself apparently.' Doctor Inglis added that the British are now making use of glass bottom boots, or more or less success in securing for submarine men in conjunction with a hydrophone. The glass used, he said, gives a clear view of the water to a depth of fifty or sixty feet.

RHEUMATISM IS SLOW POISONING

because the entire system
becomes permeated with
injurious acids.

To relieve rheumatism **Scott's Emulsion** is a double help; it is rich in blood-food; it imparts strength to the functions and supplies the very *oil-food* that rheumatic conditions always need.

Scott's Emulsion has helped countless thousands when other remedies failed.

Refugee's Substitute.

The British Navy

More Than Million Men in the Different Branches of Naval Work

The magnitude of the work going on in the navy is shown in a letter from the admiralty to Sir Gilbert Parker, answering his enquiry in the house of commons on the number of people engaged in the branches of the navy and the naval work.

The letter states that the navy proper had 146,000 officers and men when the war broke out, while number has now increased to 320,000 with an additional grant for a further increase to 350,000 officers and men. Besides 67,000 naval reserves. There are also 85,000 men engaged in work at royal dockyards and other naval establishments, and several times that number are engaged in naval work under contract and sub-contract.

Besides these, the letter specifies men engaged in getting coal for the fleet, dockside workers and civilian crews of coalers, oilers, mine sweepers, supply ships, etc., and in addition men and women engaged in making clothing and preparing food for the fleet.

Thomas J. McNamara, financial secretary of the admiralty, adds:

"I have asked to put the matter in a sentence. I would say that in the navy, in the navy, of which there are something like 300,000, there are certainly two persons and possibly even three at work on ship construction, repairing and contributing to the general safety and fighting ability of the fleet."

An aggregate of more than one million persons engaged in various branches of naval work is thus shown.

Were a Boon to a Paisley Man

DODD'S KIDNEY PILLS CURED PAIN IN HIS BACK

Mr. Jas. A. Bryce Tells Why He
commands Dodd's Kidney Pills to
All Who Suffer From Kidney Disease.

Paisley, Ont.—(Special).—"I can highly recommend Dodd's Kidney Pills for the suffering from pain in the back," says Mr. Jas. A. Bryce, who is known and highly respected in this neighborhood. "I had been troubled with a pain in my back for about a year.

After consulting the self-examination page in Dodd's Almanac, I led myself to believe that my trouble came from my kidneys so I went and got a box of Dodd's Kidney Pills. Before they were done I was feeling as well as ever.

"Dodd's Kidney Pills were certainly a great boon to me."

Dodd's Kidney Pills act directly on the kidneys. By putting them in condition to do their proper work they accomplish the cures so regularly reported. Healthy kidneys make pure blood and the man or woman who has pure blood coursing through their veins can laugh at nine-tenths of the ill of life.

Caller.—So your son Willie has got a job in office boy. How is he getting on?

Fond Mother—Splendidly! He already knows who ought to be discharged, and is merely waiting to get promoted so that he can attend to it.

Minard's Liniment Relieves Neuralgia.

"She has given up the idea of getting a 'thought' she was determined." "Determined," she had her court dresses picked."

"Did he win her back?"

"No; she heard that almonines were being worn as large as formerly this season."

Miller's Worm Powders do not need the after-help of castor oil or any preparation to complete their thoroughness, because they are thorough in themselves. Once taken, they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences on the digestive organs.

Enjoys Seeing Them Shiver

A French hospital nurse who was

sent up to Valenciennes on August 25, 1914, and who managed to escape at the end of her sentence, gives some plain facts of the behavior of German troops there.

One day Major Kintzel announced

his intention of having an execution

of French newswenders.

The nurse ventured to ask him, "Do you enjoy executing the people in death?"

"Well, I do enjoy seeing them die before me and turning green in the face when I tell them I am going to have them shot."

Potato Seed is Rare

Is Now Said to be Scarce That Is Worth Its Weight in Gold

Luther Burbank stated some time ago that potatoes have been grown so long from cuttings that people are getting out of the habit of producing seed for breeding purposes. This is the reason that potato seed is in great demand and is worth \$8.00 a pound, according to some authorities. A thimbleful of potato seed is a difficult matter to find.

Edward Bigelow, an authority on seed matters, writes in "The Guide to Nature" for February, 1914, an interesting account of the greatest difficulty experienced in securing seed for potatoes. Much of the article is reprinted in the current issue of the Literary Digest.

Bigelow recalls that 14 years ago he was a student in an agricultural college, at which the professor lecturing stated that potato seed was very scarce. Mr. Bigelow refused to believe it and tried to find the seed to prove the professor wrong.

He and his friends could find no seed in Connecticut, and since that it had been found that potato seed is very scarce and little can be had anywhere.

William Stuart, horticulturist, of the United States, Bureau of Plant Industry, writes that the reason that potato seed is not developed is that most potato plants do not produce pollen capable of germination. Such pollen develops best in northern climates and consequently the seed ball of potatoes are found most frequently in Maine, Northern Michigan and Wisconsin.

WOMEN'S HEALTH NEEDS CONSTANT CARE

Work and Worry Leaves Her a Victim of Many Distressing Ailments.

Every woman's health is necessarily dependent upon the condition of her blood. How many women suffer with headache, pain in the back, poor appetite, weak digestion, a constant feeling of weariness, palpitation of the heart, shortness of breath, pallor and nervousness. If you have any of these symptoms, you should go to Dr. Williams' Pink Pills. Under their use the nervous energy of the body is restored and the blood becomes red and pure and the entire system strengthened to meet every demand of the body. They nourish every part of the body, giving brightness to the eye and color to the cheeks and lips.

Mrs. A. S. Francis, Oakville, Ont.—"I shall be pleased to tell you that Dr. Williams' Pink Pills did for me, but I suppose it is better late than never. In June, 1913, I had to go to an hospital for an operation for uterine weakness, and was in the hospital for months before I got home. Three weeks after this I started for a trip to the Pacific coast, in the hope that my health would further improve. On the way I stopped in to tell what Dr. Williams' Pink Pills did for me, but I suppose it is better late than never. Thinks the British Are too Humane

Captain Coulter Tells of the German Ruthless Use of Russian Prisoners

Captain W. K. Coulter, a returned soldier, interviewed at St. John, N.B., says the British are too humane in their military warfare. "Shortly before I left the trenches we captured two prisoners. Our sentry saw them moving about in front of our trenches and several of us went up the bank and, circling around, came up behind and captured them. They turned out to be Russians that had been captured by the Germans at Warsaw. They told us that the Germans had taken over 100,000 Russian prisoners over from the eastern front to the western front. They use these Russians for building railways, trenches and all sorts of fatigue work—anything they don't do with their own men. Because it costs them a great loss of life they send the Russian prisoners to execute, and do not care—how many are killed. These Russians were very happy to get one more friend and impeded nothing valuable information."

"France and Belgium today are one mass of spies from end to end; every movement is watched carefully and reported at once. The German spy system is most remarkable. A few evenings before I left we captured a member of the Prussian Guard, and he gave a splendid demonstration of the typical German gall. He was captured in the divisional general and asked certain questions. He told the general that any member of the allied armies caught by the Germans with bombs in his possession was immediately shot. At the same time he knew that three bombs concealed on his person. When he was caught by our men and was being conducted through the trenches he said to the men: 'Say, why don't you chuck this business? You can't win no matter how hard you try?'

"These Germans are kept in absolute ignorance of real conditions. I remember when we were at Boulogne I saw a large camp of German prisoners, and one of them asked an English officer where they would be taken.

"We will take you to England," said the officer. "How can you do that?" replied the German, "when the English Channel is blocked by our submarines?" "It is a big deadlock on the western front, but the deadlock will remain that way all winter and I believe all next summer. I don't think the allies will never break through any distance, for it is too heavily fortified. Some other way will have to be found to get at the Germans. We can break through their lines now; we have proven it. But what's the use? It would cost a great many lives, more lives than it would be worth. I will tell you this, though: that we need all available men and them at once."

"Jones—I say, Kimber! You remember you and your wife in India? In West Africa?" Well, Captain Wiggin tells me there are none there. Kimber—Quite right, quite right! I killed them all!"

WOMAN AVOIDS OPERATION

Medicine Which Made Surgeon's Work Unnecessary.

Astoria, N. Y.—"For two years I was feeling ill and took all kinds of tonics, but nothing would help me. I was always tired. I could not walk straight because of the pain in my back and I had pains in my stomach, which tormented me. I went to a doctor and he said I must go under an operation, but I did not go. I read in the papers about a

Lydia E. Pinkham's Vegetable Compound and told my husband about it. I said 'I know nothing will help me but I will try this.' I found myself improving from the very first bottle, and in two weeks time I was able to sit down and eat. I had a very bad back, which I had not had for two years. I am now in the best of health and did not have the operation." — Mrs. JOHN A. KOENIG, 502 Flushing Avenue, Astoria, N. Y.

Every woman reads the surgeon's knife and the operating table. Sometimes nothing else will do; but many times doctors say they are necessary when they are not. Letter after letter comes to the Pinkham Laboratory, telling how operations were done and were not performed or, if performed, did no good, but Lydia E. Pinkham's Vegetable Compound was used and good health followed.

If you want advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.

W. N. U. 1094

Manitoba's Dairy Industry

Remarkable Increase of Dairy Products is Shown for the Year 1915

According to a bulletin issued by the department of agriculture of Manitoba, the dairy industry had a most successful season in the year 1915. There was an increase of over 1,000,000 lbs. in creamery butter production over the previous year, about 260,000 lbs. increase in dairy butter and over 25,000 lbs. increase in the output of cheese. The increase in the total value of milk and milk products was over \$427,000.

The production of dairy butter for the province during the year was 4,000,443 lbs., the value of which was \$2,228 per cent. The production of cheese was 75,729 lbs., and the average price per lb. was 10 cents. The total value of these three products is given as \$2,769,697.40. In addition to this is a milk production valued at \$925,559.00, and cream products valued at \$153,826.00. The average price per lb. was 25 cents per lb., and the average price of sweet cream 32c per lb.

In connection with the dairy industry of Manitoba, it is interesting to note that almost the most important market now is the eastern market. In 1915, notwithstanding an unfavorable season, amounted to 190,132 tons. The biggest cultivated fodder crop is timothy, which produced for the same season 193,357 tons. The next largest power crop is bromegrass with 45,313 tons. Of alfalfa and clover some 38,000 tons were produced.

The number of cattle in the province is quoted at 631,000, which is a decrease of 10,000 from the previous year. There has been little change in the number of horses and sheep and a slight falling off of pigs.

Livestock Shortage

Government Lending Assistance and Co-operating With Breeders

Owing to the heavy drain upon the livestock of the warring countries of Europe a great livestock shortage appears to be looming up in the future. The longer the war lasts the greater the shortage will be, and when that day is over undoubtedly many animals will come to Canada to replenish their breeding herds. With this event in view the government has decided to increase its efforts to encourage farmers to increase their improvement breeding stock. The minister of agriculture, through the livestock branch, has decided to grant liberal aid to breeders who wish to secure good breeding stock. The conditions under which aid will be given are as follows:

In the event of a number of farmers in any district of Canada wishing to co-operate for the purchase of breeding stock in certain lots from some other section of the country the department will pay the travelling expenses of their duly appointed representative during the time required to effect the purchase and transport of the animals.

Should it be desired the livestock commissioner will nominate a suitable person who will be directed to accompany this representative and assist him as far as possible in buying and shipping the animals.

Canada's Military Efficiency

There was no sign in Premier Borden's New Year speech that Canada is growing weary of supporting England in the war. The common sentiment exists in the United States of the extent to which the Dominion is being developed as a military power. Were all of its forces at home, Canada could have 1,000,000 soldiers armed, and such an army trained and equipped would put the United States into the shade. Canada is also developing very rapidly a great munitions industry under the direct stimulus of the British war. It has been intimated within a few months the British government could afford to ignore the possibility of an American embargo on munitions because of the nation's much increased capacity of production. The war will end, apparently, with our good neighbor thoroughly and efficiently organized on a war footing for the first time since our civil war.

Many Canadian people need this powerful vegetable remedy that puts the stomach, liver and bowels in fine condition; that clears the skin of pimples, rash, blisters, and eczema; that dissolves boils and carbuncles; that makes the skin smooth and elastic; gives to pale, weak, rundown people the fullest measure of health and happiness.

Dr. Pierce's Golden Medical Discovery, free from alcohol or narcotics, does just what is stated above, simply because it bathes every part of the body in a pure, impure matter. It dissolves the impure deposits and carries them out, as it does all impurities through the Liver, Bowels, Kidneys and Skin.

"Our Major 's an officer and a gentleman. The other day he comes into the canteen, and says, 'Any complaints?' And I says, 'Yes, sir.' Beg your pardon, sir, but I can't fit in with you. So he says to the bloke who'd served us, 'Give us a cup.' And when he'd tasted it, 'Ogwash,' says he, 'Ogwash, these melt up,' and when he'd done this he says to the bloke, 'Line them up,' and when he'd done this he says to the bloke, 'Line them back their tuppences.' And I'd never paid mine."—London Chronicle.

Expenditures in Agricultural Aid

How the Federal Grant Has Been Spent by the Provinces

The report of Mr. C. C. James on the work done in the various provinces of Canada under the Agricultural Aid act and the Agricultural Instruction act has been presented.

It covers the four years since the passing of the Hon. Martin Guelph's two acts for the improvement of agricultural conditions by federal financial aid, and is a voluminous work.

The total amount of the federal grants in those years has been \$2,000,000,000, or \$200,000,000 per year being half a million with annual increases of one hundred thousand dollars.

In a survey of the work done Mr. James devotes considerable space to emphasizing the importance of agricultural education and points out that agricultural instruction in the schools has become widespread in the United States.

The question of efficient rural schools, he says, is one of the pressing problems of the day, and the farm boys and girls receiving their whole education in one-teacher schools of very low efficiency.

The report gives details of the use made of the grants in purchasing buildings and equipment both in connection with and independent of the agricultural colleges and reviews the field covered by "women's work." Under the latter head there has been spent \$35,932, of which Ontario spent \$15,128.

The importance of the work of agricultural, district, representatives is also emphasized, the expenditures in Ontario under this head amounting to \$190,320. The total grant to Ontario of a total of \$44,876 in short courses, which the report describes in detail, Ontario spent \$25,974.

Over half a million has been spent in the nine provinces on demonstrations, the largest amount being \$228,000 in Quebec; \$50,538 in Manitoba; \$39,555 in Saskatchewan; \$32,160 in Alberta; \$3,143 in British Columbia; \$2,168 in Nova Scotia; \$41,234 in New Brunswick. This demonstration work is described as the dominant note in instruction work in the United States.

Australian Capital to be Named Anzac

The New Australian Capital will immediately be a great need.

"It is rather that a manufactured name lives or shines in history," says the Manchester Guardian. "The Australians knew this well when they rejected the name of Victoria, and that they should call their new federal capital Edwardville, Georgetown, or the like, and fixed on the old native title of Yass Canberra.

"There surely can never be so happy a state of letters as the one in which the officials of the official title of the man who did the impossible on the cliffs of Gallipoli, for they make a word with a Homeric ring that speaks of pride and strength in it, swelling and braving even if we did not know its content, a fitting word to mark the capital city of a young and lusty nation.

AN ONTARIO WITNESS.

Suffered from Rheumatism.

Waterloo, Ont.—"We use Dr. Pierce's medicine in our home and have always found them to be the very best. Once a time ago my husband was taken sick with muscular rheumatism. He was very bad for four years and never got a break in his health. He took several different kinds of medicine and had several good doctors in that time, but did not get one bit of relief. He began taking 'Golden Medical Discovery' and 'Pleasant Pellets.'"

"I imagine that in Britain, where small subscribers are now numerous a certain proportion of debt will be paid off by the time the war is over. The very just reason that men rich enough to lend big sums to the state are rich enough to lose them. It is immoral, but we should only laugh, and so would even the rich men thus forced to count."

"Perhaps they would receive titles of nobility, a compensation that will be an admirable and practical apology for their conduct."

"Anyhow we shall see many finances and the spectacle of Central Europe administered like an estate for the benefit of France, Russia, Italy, Serbia, Montenegro, Japan, Austria, New Zealand, Canada, South Africa and India."

"Those who till the soil will be rich after the war; those who do not will be poor, but there will be no more Germany."

PURE BLOOD

The Greatest Blessing Mankind Can Have.

Many Canadian people need this powerful vegetable remedy that puts the stomach, liver and bowels in fine condition; that clears the skin of pimples, rash, blisters, and eczema; that dissolves boils and carbuncles; that makes the skin smooth and elastic; gives to pale, weak, rundown people the fullest measure of health and happiness.

Dr. Pierce's Golden Medical Discovery, free from alcohol or narcotics, does just what is stated above, simply because it bathes every part of the body in a pure, impure matter. It dissolves the impure deposits and carries them out, as it does all impurities through the Liver, Bowels, Kidneys and Skin.

"Our Major 's an officer and a gentleman. The other day he comes into the canteen, and says, 'Any complaints?' And I says, 'Yes, sir.'

The Finish of Germany

Extermination of the Teuton Species is the Prediction of Kipling

The Toronto Globe publishes the following article from Rudyard Kipling:

"We are passing through dark, damp days which are not good for the soul.

"I have known some black moments and doubtless shall know worse. The Germans are exploiting all the people of Europe, which is a terrible understanding, and his press just now is engaged in confirming the world in the idea of a motionless unbeatable Michel, straddled across Europe and disdainful of his little enemies.

"The idea is beginning to penetrate that this is not a war of victories, but a war of extermination of its species. We are better informed on this point than we were a year ago.

"When a whole nation goes into the trenches, the idea of victory there can only be killing, and at least three nations desire greedily that the Teuton be killed in retail since he cannot be killed in wholesale."

"The German cannot withdraw from his present lines. He will not be won to peace without an armistice. His people are not yet so far advanced that they can be won to peace without an armistice. The destinies are bearing us despite all efforts we have made to avoid it.

"The question of indemnity to Germany has disappeared by the force of facts.

"It is why the ships cannot be allowed to go on the sea again. 'She can defend and consolidate her conquests, but what good is consolidation to us? She is still capable of regaining her lines.'

"Allah has decreed that she shall perish by her own act, from the consequences of her own sins, she has brought upon herself.

"She can never wage any more war than she is now waging, because she is engaged in all possible fronts. She can defend and consolidate her conquests, but what good is consolidation to us? She is still capable of regaining her lines.'

"No Germany will remain. This may sound extravagant, but all that will remain will be a few peoples living on the eternal defensive in moral, social and political trenches. Grant that it is a terrible idea, but Germany factors a defensive impossible, and the war will end on France, who has paid the price of the war. Even when we must hold on to France, Britain will have half million losses and about to pay more: Russia with her dead impossible to count.

"All the rains are before us in the same direction as far as Britain and the empire are concerned, we can put as many men into the lines in France as in the fringe of fire burning all around her?

"Allah has decreed that she shall perish by her own act, from the consequences of her own sins, she has brought upon herself.

Breed Dairy Cows, Is Expert's Advice

Prof. H. H. Dean of O.A.C. Gives Good Tip at Holstein-Friesian Banquet

"There are no risks with the dairy cow, therefore it is a sure investment and makes the farm pay. Through many generations man has seen his herds grow and modern science has either discovered nor invented anything to take its place in supporting mankind; therefore I advise you to breed the dairy cow," said Professor H. H. Dean of the O.A.C., Guelph, at the annual annual banquet of the Holstein-Friesian association at the Carle-Rite.

The importance of the rural school for the continuance of intelligent farming was emphasized by C. C. Bailey, Ontario's minister of agriculture for Ontario. Since 1912 when these were commenced with a nucleus of twenty-five schools, I am proud to say that last year it extended to 234 farms, thus increasing the number of students and employing over 43,000 pupils."

Other speakers during the evening were D. C. Platt, the president; Dr. J. A. Macdonald, who spoke on "Canada's Particular Problem"; Dr. Day of the O.A.C., and A. J. Craig, Alberta's deputy minister of agriculture, both of whom spoke on agricultural topics.—Toronto Globe.

Livestock in Demand

Farmers and Ranchers of Alberta Benefiting From Competitive Market

Following is part of a report made by a livestock commission firm at Calgary, which tells its own story:

"The best indication of the growing strength in the market is the broad market for generous receipts, which in the case of hogs, the eastern packers are apparently unable to buy sufficient hogs in the east to fill the demand, and are therefore compelled to pay high prices here to compete with local packers. In regard to the cattle market we opened a new outlet by shipping to Seattle, which has had a stimulating effect on the market here. We have had shipped, since the market opened, all the surplus hogs of beef cattle. We might also add that these cattle brought the top price on the open market. The highest price paid on the Seattle market was for an Alberta steer, which we shipped December 20, 1915, weighing 1,700 lbs., which brought the fancy price of 10c per lb.

"Since the opening of the Alberta stockyards the livestock business in Alberta has grown and markets have been opened, which have given the farmers a competitive market for their livestock.

"The hog industry has multiplied many times in the last three years. There are now more than 100,000 sows to an increase in the number of sows and cattle. The sheep business is being developed rapidly, and the demand for breeding ewes has gone up both east and west. Breeders of pure-bred sheep have sold all they can spare. During the past two of the year farmers and ranchers have been increasing their herds; cows and heifers have been concerned, and while many men have been sold to the country for breeding purposes. The producer in the country has no need to worry, and we anticipate good prices for everything he has to sell."

One of the questions of the San Francisco Examiner's animal story contest, upon which children are asked to write is, "Why does a cow need two stomachs?"

"The answer evidently had much to do with the deductions of little Mark Schey, of Fruita, for he replied:

"So when she has an ache in one of her stomachs she can use the other one."—Our Animals:

How You May Throw Away Your Glasses

The statement is made that thousands

of eyeglasses who do not really need them, then these glasses may ruin your eyes instead of helping them. Those who have been told that they will prove to be useful may be disappointed.

"Anyhow we shall see many finances and the spectacle of Central Europe administered like an estate for the benefit of France, Russia, Italy, Serbia, Montenegro, Japan, Austria, New Zealand, Canada, South Africa and India."

"Those who till the soil will be rich after the war; those who do not will be poor, but there will be no more Germany."

How Japan Helps

Germany's apprehension over the Russian offensive is expressed in the "Kolnische Zeitung," which says that the slackening in the struggle in the Balkans does not mean that the Russian offensive is over.

"The Japanese are not only providing artillery and machine guns, but are also sending part of the Russian infantry in Galicia. The Russian infantry in Galicia are armed with rifles of Japanese origin.

Russians Slaughter Enemy

Germans Were Made to Advance at Any Cost

Some idea of the stubbornness of the opposition which our allies have to overcome in Volhynia may be obtained from details of the fight for Khrustiak, six miles north of Chernovitz.

Having crossed the Styx and seized the village, the Russians began to entrench themselves on its southern and south-western outskirts. While this work was being hurried on, dense masses of the enemy appeared on the heights above, and from the village, which defused with smoke, batteries hidden in depressions in the ground, streamed down into the plain.

Traversing two-thirds of the distance which separated them from the Russians, they vanished in a gully which they received and consolidated their depleted ranks.

As soon as they emerged from this cover they were met by a withering fire from the Russian machine guns and rifles, which swept them off their feet in showers and sent the remnants flying back to the shelter of the gully.

Nevertheless, four further attempts were made to drive them on in this way, and it was only when the Russians, following in the wake of a fifth, took up a bayonet charge, cleared out the gully that the Germans gave up their attempts to regain the lost position.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Cure is within reach of all.

Will Prevent Relief Fund Frauds

It is officially announced that in order to secure better co-ordination of appeals in behalf of the Belgians and to prevent the possible grosser or secret, and the misappropriation of funds obtained in response to such appeals, the Belgian and British governments have decided to make arrangements giving official recognition only to appeals approved by the two governments.

Official recognition will be given in the form of a certificate issued by the local government board. This certificate will be issued only after the Belgian government has been consulted. The public, therefore, are warned not to subscribe to appeals in behalf of the Belgians not bearing the official certificate.

"Nobody loves a fat man."
"Wrong again. The tailor does."

PERSONALS.

A Prominent Ontario Woman Speaks.

Welland, Ont.—"I am glad I heard about Dr. Pierce's remedies. When I was tired-out and worn-out I used 'Golden Medical Discovery' and 'Nerve Food'. I am sure it is true that they are grand remedies, and I found that they built me up like a made-for-life new person. I believe I used seven bottles of all. I have recommended Dr. Pierce's remedies to several of my acquaintances."

"I have one of Dr. Pierce's Common Sense Medical Advice books and think very highly of it."—Mrs. MAY CLARE, 117 State St., Welland, Ont.

Dr. Pierce's Golden Medical Discovery is a tonic and builder that brings new activity to the liver, stomach and bowels in a short time, thus causing fullness, indigestion and constipation to disappear.

Good blood means good health; good health means strong men and women, full of vigor and ambition, with many a smile and a ready willing. Any medicine dealer will supply you with Dr. Pierce's Golden Medical Discovery in either liquid or tablet form. Send to Dr. Pierce, Invaid's Hotel, Buffalo, N. Y., for free medical advice.

Dr. Pierce's Common Sense Medical Advice—great doctor book—1008 pages, cloth bound, with a wealth of important questions. Can be sent for 50 cents (or stamp) to pay postage and mailing charges.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated and easy to take as candy.

W. N. U. 1096

Annual Demand for Marbles

Each Spring 200 Million Are Used in the United States

It has been estimated by statisticians that more than 200 million small clay marbles are used by the boys of the United States every spring time. It is a known fact that 125 million marbles are made every year by one clay marble manufacturer whose plant is in Summit County, Ohio. And these are made or rolled by young girls.

The marble manufacturer does not devote all his attention to the manufacturing of the "game marble." There are various uses to which the marble may be put, and one of the fact, the size varies according to the use. The Standard Oil Company is one of the largest buyers of marbles, and these are started in graded pipelines to clean out the paraffine which gathers on the side of the pipe as it flows.

Clay marbles are used also by the manufacturer of rubber, ink and salt, chemical and powder makers. They are used also in grinding the large stones of the lithographer and by railroads to move people. Puzzles, bead makers and many other uses of marbles.

The sizes of the clay marbles as made in the United States vary from ninetysixteenths of an inch in diameter, which is the small "pill" the boys play with, to one measuring six inches in diameter, or about the size of a small cannon ball.—Chequing Plain Dealer.

GUARD THE BABY AGAINST COLDS

To guard the Baby against colds nothing can be better than Baby's Own Liniment. The Tablets are a mild liniment that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that cold will not exist; that the heart will be strong and good and that he will thrive and be happy and well-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Minard's Medicine Co., Brooklyn, Ont.

Good Advice

Lord Bryce gives this advice to his countrymen: "Let us warn them against the spirit of reprisal. It is human to wish to beat an enemy at his own game. But to answer brutality by war mere butchery. The allies cannot afford thus to alienate the sympathy which their humane conduct has gained for them."—Philadelphia Ledger.

Minard's Liniment Co., Limited. Gentlemen.—My daughter, 13 years old, was thrown from a sleigh and injured her elbow. It had been rendered very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has not been troubled for two years.

Yours truly, J. B. LIVESQUE, St. Joseph P.O., 18th Aug., 1909.

Thay's Cost Money
"He is getting rich by saving his nickels."

"That is the only way."

"But too expensive."

"How is it?"

"See how much it costs him to get them."

High Cost of Living

Greater Attention to Mixed Farming and Increased Production Will Help to Remedy Conditions

An important cause of the high cost of living has been the general demand for improvement in living conditions, arising through the spread of education, says the report of the cost of living commission, published in the New T. W. Crothers.

"The advance of prices in Canada," the report continues, "has been stimulated greatly by the enormous expenditure of railways and public works, and by large investments incidental to the development of a young country such as Canada."

After pointing to the manifold forms of waste going on in the land, the report points out that another cause is in the household. "But," the report says, "the main factor in enhancing the cost of communities is the withdrawal of the population from the rural areas, which has decreased the proportion of people engaged in food production."

The commission look for improvement through land settlement, greater attention to mixed farming, increased production, with a standardization of quality in farm products, together with co-operation in distribution. Extension of the parcel post system, and the building of good roads would reduce the cost of producing the staple commodities of the farm.

The growing demand, especially in the west of the land for cheapened and accessible "working capital," is pointed out. This would assist farmers to develop their farms and enable them to supplement the growing of cereals by the production of meats and dairy products.

The commissioners also suggest that the teaching in the public schools should be supplemented by vocational training.

Music and War-time

Since the days when Taillefer, the

minstrel, led the hosts of Normans

history has not furnished us with a

more dramatic picture. The tall sing-

er, clad in his coat of mail, sat upon

his prancing war horse, and tossed

and caught his great sword as he rode

on, sang how he must have sung! And

the whole army behind him joined in

the song until the very hills seemed to

shake to the mighty volume of sound.

Before then and since then music has

been necessary, a part of war,

almost as the sword—music, or its

counterpart the inspiring, piercing,

overwhelming battle cry.—Victoria

Anti-German League

Seeks to Enroll 1,000,000 Members and Get Free Trade Secrets

Destruction of every German influence in Great Britain, imprisonment of all alien subjects, and capture of all German secrets, are aimed at by the Anti-German League. This organization is increasing in strength daily, and has the backing of influential business concerns in Britain. It is attempting to gain a million members.

The objects of the league follow:

1. To enroll 1,000,000 members who will take the anti-German pledge.

2. To amend the law relating to alien immigration and the naturalization of Germans as British subjects.

3. To induce legislation for a

protective and, if necessary, prohibitory tariff on all German and Aus-

trian-made goods.

4. To investigate German patents, processes and monopolies with a view to imparting knowledge and information to British traders, manufacturers, and others who desire to work same.

5. To negotiate financial and other assistance for British manufacturers who undertake to undertake the production of goods hitherto made in Germany and Austria.

6. To assist in returning to parliament any candidates irrespective of party, who will pledge themselves to support the objects of the league.

7. To draw the virus of the disease from the body of the German and Austrian peoples.

News in General

Business section of Paris Texas, entirely wiped out by fire. 1,500 to 2,000 dwellings were destroyed. Loss is placed at 10 million dollars.

Toronto, March 22.—The Mail and Empire announces today that the legislature probably will bring prohibition into effect Sept. 1 as a war measure without a referendum, a vote to be taken after the war.

Ottawa, March 23—Recruiting in Canada is proceeding at the rate of over 1,000 men a day during two weeks from Feb 29 to March 15. The total number of men who have now enlisted for overseas service is 279,242.

Twelve Oil Wells Burning

Tusla, Akla, March 22.—Damage estimated at fully one million dollars was done in the oil fields near Drumright last night when a fire starting in a pile of refuse spread to the wells. At midnight 12 wells were burning.

Union Meeting

On account of the storm on Tuesday the meeting, called for the discussion of the Creamery and Agricultural Society, was very well attended.

Geo. Hazlewood was chairman and Thos. Partridge, Secretary.

A great deal of discussion took place regarding the starting of a Creamery in Monitor and several good points were given by Mr. Hayes, who has had practical experience in this business.

A motion was carried that the Secretary write for full particulars from the Government re the Creamery business.

The formation of an Agricultural Society was then taken up and forms were given out to different men to have subscriptions signed and when sufficient names are secured a petition will be sent to Edmonton.

The next meeting is called for 2 o'clock on Saturday afternoon April 1st. Everybody is welcome to attend. The meeting will be held in the Orange Hall.

Returns from Red Cross Day

Mrs. Sanford English,
Monitor, Alta.,

Dear Madam:—

I beg to acknowledge, with thanks, receipt of your postal note for 50.80, being a contribution from the ladies of Monitor. We are most grateful for this splendid help and must congratulate you on your efforts on Red Cross Day.

Would it be possible for you to organize a branch at Monitor. I enclose some information, which may be of interest to you and I am also sending you copy of our Annual Report from which you will get a good deal of information about our work.

Will you convey our grateful thanks to all those interested.

Your faithfully,

M. Pinkham
Honorary Secy-Treas.
Alberta Prov. Branch

6.10 of the above amount was donated by local merchants.

Stonelaw

The basket social and dance held in the Stonelaw School in aid of the Walker family was a great success and the sum of \$1.00 was realized by the sale of boxes and lunches. A splendid contribution was made by Mr. Blackley and family who gave two baskets, bought three, and supplied most of the music free. Mrs. Evans, who is always ready and willing to sing, rendered a solo.

The Secretary has 125 lbs of formaldehyde at his residence to supply members at 20 cents per lb. Bring your bottles, and don't be too late in coming for it. There is about 50 spools of 2 pt wire for sale at 3.80 a spool.

Every member is urged to attend the meeting in town on Sat., April 1st at 2 p.m.

Creek Valley

The local U.F.A. at a meeting held last week decided to call their branch the Creek Valley U.F.A.

The Trustees of the Sounding Lake S. D. have decided to change the name of that school to Creek Valley School.

There will be a meeting in Monitor on Saturday the first of April at 2 o'clock. Formation of an Agricultural Society and a Creamery will be discussed. Everybody welcome.

Sounding Lake

There were several farmers from this district at the meeting on Tuesday when the Fall Fair and the organizing of a Creamery was commented on.

There will be another meeting for again discussing things on Saturday April 1st., at 2 o'clock.

Apparently we have two gas-tanks. What about that team, to say nothing of the cow "That would be 'arf our livin."

CLOSER RELATIONS WITH BRITAIN AND THE OVERSEAS DOMINIONS

PLAN WELDING OF THE EMPIRE AFTER THE WAR

Sir Rider Haggard is Making a World Tour With the Object of Investigating the Opportunities for Empire Building at the Conclusion of the War

Sir Rider Haggard has left England on a trip around the world, with a mission from the Royal Colonial Institute to investigate the chances of empire building after the war. His plan, backed by the aristocracy and important officials, including Lord Curzon, is to prevent the emigration to foreign countries of soldiers and their families after the war, and to direct steamship services of these war veterans to the British colonies in South Africa, Australia, New Zealand, Canada, and the many insular colonies—thus recruiting the population with a sturdy and intelligent class, and holding them within the British empire.

It is the latest phase of the imperial movement which is likely to bring together the Mother Country and the overseas dominions into a vast confederacy.

While he is one of the interesting literary figures of England, he is被誉为 a Justice of the Peace of his honor, and in Norfolk, he is interested in land settlement, unemployment, and agriculture, and that qualification led to his choice as commissioner.

He will go first to South Africa, then return to the Straits Settlements, Australia, New Zealand, and will be in the United States and Canada next summer or fall, going from the Pacific to the Atlantic.

"I am going to inquire," said Sir Rider, "into the possibilities of the British Empire, concerning land settlement and employment of overseas men after the war. It is obvious that, during the tumult and change of conditions resulting from so great a struggle, a large number of men will be dissatisfied with their former employment."

"I am going merely to inquire and report and to form my own conclusions from what I see. That, I think, is a useful work, since it is foolish to put on such investigations that the world, when we are in a position of great difficulty in dealing with the matter. Indeed, the problem of land settlement is one which cannot be tackled in a hurry. My conclusions will be embodied in my report to the Royal Colonial Institute, and will be based on the landed and other resources of the empire." Referring to the class of war veterans who would go out to replenish the colonial empire, Sir Rider said: "Some of them are being educated as possible leaders, and, of course, taken as a whole, be of the very highest class, soldiers and sailors who had been under discipline and shown themselves to possess the best qualities of manhood. Any portion of the nation should be glad to see such men and their manhood arrive as an addition to their population, and I am quite sure many parts of the empire will welcome them. There is another thing I am sure will result, that the empire will cease to be so fond of admitting Germans and other foreigners within its gates, and will prefer to stick to Anglo-Saxons."

National Characteristics

There have been no miracles in this war except as each of the combatant nations have lived up in supreme fashion to its national character and traditions. For Germany were expected extraordinary preparation, good leadership and ruthless determination and self-sacrifice, and in these are found the secrets of German achievements. From France were expected initial blundering and then a splendid course, good leadership and readiness for self-sacrifice, and these France has shown. Russia has been Russia—ineffective in sustained offensive, splendid on the defensive, receding into the rear without succumbing. England has been England, prepared on the sea, unprepared on land, muddling, quarreling, resolute under adversity, growing stronger with time—New York Post.

Must be Agreement

There must be commercial agreement between the Dominions and the Allies. There is one main weapon which such an agreement would create—tariff arrangements to benefit the products of our friends, and to penalize those of our enemies. It is difficult to imagine a form such an agreement. Great Britain alone would come with empty hands. She would, under her present fiscal policy, have nothing with which to help the trade of her kinsmen and her friends, nothing with which to harm the trade of her enemies—London Times.

The Court of Last Resort

The New Jersey board of education has made the solemn ruling that a boy does not have to wear a collar at school if he doesn't want to. But the comfort thus conferred upon juveniles is not shared by the parents of the boy. New Jersey is vastly different from most other States, the boy will soon learn that his mother is the court of last resort in the matter of wearing a collar, and the decision of the board of education is likely to be overruled.

From Dream to Reality

Aviation no Longer Considered Experimental, but an Actual Factor in Modern Public Service

Aeroplane mail-carrying is now recognized by the United States Post Office Department, and makers of aeroplanes and balloons are invited to tender for carrying them on some important coast routes. The announced objects of the innovation are the improvement of the service and the development of the science of aviation.

One route selected is from New Bedford across Buzzard's Bay and Nantucket Sound to Nantucket, stopping twice on intervening islands, is about 56 miles. Two hours are allowed for the trip. Thirteen return trips are to be required for the four summer months, and six weekly trips during the remainder of the year. The weight limit is 3,000 pounds, and the hours of starting and arriving are to be from Valdez to Alaska, 358 miles, and from banks to Tanana, 162 miles, three times a week. A service twice a week is required from Tanana to Kaltag, 381 miles; from Kaltag to Atka, 222 miles; and from Eeward to Iliamna, 389 miles. These other routes, set forth with definiteness as to hours and weights, are subject to tender, the contracts to be awarded when the bids are opened in May and October next.

The definitive part of the departmental demands show that the innovation is no longer regarded as nebulous, experimental, or uncertain, but as an actual factor in modern public service. From the vague stage of theoretical inquiry, aerial navigation has become, in a few years, the object of governmental tender by practical men of business. Cost of manufacture and operation is counted with the systematic regularity long established in other carrying trades. Fuel consumption, rate of speed, types of construction, and methods of operation are considered with careful regard to detail. The new century has witnessed the coming of age, but the problem of distributing the benefits of the growing multitude of useful inventions remains unsolved.—Toronto Globe.

A Palace of Salt

Walls of the Mines of Wieliczka Gilt-Like Diamonds

In Galicia seven miles from the ancient city of Cracow around which the warring Prussians and Russians are fighting, is located the famous salt mine of Wieliczka.

The mine has been actively worked ever since its discovery, almost seven hundred years ago. At the present time the excavations reach a depth of more than three thousand feet.

The deepest interior mine is made by shafts and galleries. The latter being carved entirely of rock salt, sparkle so brilliantly that one feels at each step as though he were on a floor of crystal glass. Before reaching the bottom of the mine, it is necessary to travel over many of these beautiful stairways, for the mine of Wieliczka is divided into three distinct compartments called fields; each field consists of seven stories and each story is made up of several chambers.

Some of these chambers are a hundred feet high, a hundred feet long and eighty feet wide. They are left in the process of excavation, and when any addition is required it is built with salt and water. Millions of salt are piled one upon another and when dissolved they dissolve a portion of the salt, which fills up the crevices. When the water evaporates it leaves a solid mass. Columns of salt are left to support the roof.

As there are no springs at so great depth, the air is very dry, and everything is kept in the most perfect state of preservation.

One of the largest chambers is used as a ballroom, where gayly dressed men and women sit on the floor, talking, laughing, alight with candles and statues are all of solid salt, yet everything is so translucent that a torch held behind one of the statues shows light through its thickest part.

But the most wonderful thing in the great salt mine of Wieliczka is the chapel of St. Anthony, where the floor, walls, ceiling, altar, pulpit, statues and statues are all of solid salt, yet everything is so translucent that a torch held behind one of the statues shows light through its thickest part. When the chapel is lighted everything in it sparkles as though studded with diamonds.—L. G. Randal, in Harper's Weekly.

With the development of the age we made neither grain nor babies any longer.

Mobilize British Women

Big Government Scheme to Care for Agricultural Needs of the Nation

The London Daily News gives some details of the government plans to organize a recruiting campaign for women to till the soil.

It is proposed to issue an armlet to women to wear, to make a workers farm work, and that they will be entitled to wear a special uniform.

Every village will be canvassed by woman's committees, and all who volunteer will be registered and given an armlet and uniform, which consists of a coat, stout boots, skirt and garters.

Already 250,000 men have been withdrawn from the field of agriculture, and it is anticipated that a further 100,000 will be lost to this occupation. The number of sheep, sheep herders, ploughmen and others who are indispensable will remain.

It is essential that an army of at least 400,000 women be mobilized.

"Frightfulness" Has Failed

What is the object of frightfulness? Obviously to affright, to weaken, to create awe of the frightener. But the Germans must know by this time that their campaign of frightfulness has not terrified the people of England. The Germans have proved that the war will be given up because of what the marauding Zeppelins may do. The country goes calmly about its business, exactly as if Zeppelins did not exist, and the only sentiment inspired by the Kaiser's dirigites is one of indignation and loathing. Making fun on women and children is what they call it in England.—Providence Journal.

An American View

The U.S. Needs the Friendship of England and France

F. H. Taylor, of the University of Pittsburg, writing to the editor of the New York Tribune, says:

The present war has announced he is ready to fight to preserve the full liberties of American trade, and Congressman Mann says he considers war with England more probable than war with Germany.

He adds these leaders failed to think of the consequences of a war with the entente?

If the present war is carried to a conclusion it can only end with the destruction of the German navy and the Krupp works, and we know that the czar expects to last at least a year.

He adds: "The war will be a race of months, not years, and the war will be decided by the number of factories which are continually being added to the Russian and English munitions plants is based on this calculation.

When peace comes in Europe the entente and Russia will probably have 15,000,000 men under arms and they will be able to sweep the world which lessens their debts by \$40,000,000,000. It would be easier for Great Britain to operate in New England than at Salomon or St. Eustatius. The four million sailors could land 200,000 men every ten days while Japan, with her standing army of 1,000,000 and her population over 71,000,000, all trained by the German system, could operate from Hawaii and they would be able to sweep the world which lessens their debts by \$40,000,000,000.

It would be a race of months, not years, and the war will be decided by the number of factories which are continually being added to the Russian and English munitions plants is based on this calculation.

He adds: "The war will be a race of months, not years, and the war will be decided by the number of factories which are continually being added to the Russian and English munitions plants is based on this calculation.

He adds: "The war will be a race of months, not years, and the war will be decided by the number of factories which are continually being added to the Russian and English munitions plants is based on this calculation.

Any Person Can Buy Hardware

BUT

it is not every one who knows whether it is good or bad until after they have USED it. And right there is a little bit of wisdom of buying Hardware at our store. We know that most people must rely on what we tell them about the quality of our goods, hence we make it a principal in business never to sell an article that we do not know to be O.K. in every respect.

Isn't There Something You Need for Your Spring Work in the House or on the Farm?

Undoubtedly we have it and will sell it at as low price as possible in these days of rapidly Advancing Prices. Let us figure on your house or barn or other requirements.

Communication

MONITOR, March 11th.
to the board of management of the church of england.

Dear Sirs: On behalf of my congregation I wish to thank you heartily for the kindness you have shown in granting us the use of your church for Sunday evening services during the past few months.

Personally, it has been a real pleasure to me to be associated with you in this matter and to enjoy the kind spirit of co-operation that you have always shown me. I trust that the most cordial and mutually helpful relations will always exist between the leaders and members of the two congregations in order that we all may minister most successfully to the highest welfare of our community and of the people.

Adding my personal thanks to this expression of the public gratitude, I am yours in the great work of the kingdom of god,

Rev. J. L. Wright.
